

Gentlemen, Having just purchased a new computer I look forward to making a few copies of my favorite CD's for my personal use. If I understand the language contained in this bill I would now be committing a criminal offense. I am a strong supporter of the prevailing copyright laws and have on several occasions told people selling pirated software to take a hike. If the movie, recording, and software industry can't come up with a better way to protect their goods, then let's try hitting the software pirates where it hurts. IN THEIR BILLFOLD! Thank you for the time and place to express my view.
